Status of Claims

1. Claim 27 has been examined.

Response to Amendments/Arguments

2. Applicant's new claim 27 is a method. Claim 27 also contains structure. However, it has been held that structure in a method claim, in order to be patentable weight must affect the method in a manipulative sense and not to amount to the mere claiming of a use of a particular structure (Ex parte Pfeiffer, Ex parte Pfeiffer, 1962 C.D. 408 (1961)). Therefore, as the structure of the "non-centralized communication network" (parallel processing, tiers and the like) does not affect nor play a role in the method steps of "enabling delivery of merchandise" or monitoring member access to said network, it does not patently distinct from the prior art (Ex parte Pfeiffer, 135 USPQ 31 (BdPatApp&Int 1961)).

Applicant's arguments with respect to claim 27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 27 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 27 is dedicated to a method. However the body of the claim describes a system. Therefore, the claim is non-statutory as it is not a process, machine, manufacture or composition.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 27 is directed to a method, however the body of the claim describes a system. Therefore, the scope of the claim is not apparent to one of ordinary skill in the art (... an essential purpose of patent examination is to fashion claims

that are precise, clear, correct, and unambiguous (In re Zletz, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989)).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kenner et al., U.S. Patent No. 5,956,716.

As per claim 27, Kenner et al. teach a non-centralized communication network for supplying content to users. Kenner et al. also teach enabling delivery of merchandise over said network and facilitating an environment where an organization can control the access and interaction of its members with the network (column 6, lines 17-26; column/line 21/19-22/10; column/line 27/64-28/17). Kenner et al. does not specifically recite religious organizations. However, a religious organization is still an organization so it would have been

obvious to one of ordinary skill to apply the teachings of Kenner et al. to computers located in a church or other faith-based environment.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
